To Whom It May Concern.

My Name is Anthony J. Manenti -

I am a Graduate of UNC – Greensboro's College of Arts and Sciences. I am also a graduate of The Coding Bootcamp at UNC Chapel Hill's Spring 2018 cohort where I was exposed to the MERN stack of technologies used in the creation of web based applications.

I have also completed UNC's Coding Bootcamp. I am a member of the 2018 Spring Cohort. In Bootcamp I was exposed to HTML, CSS, Javascript, MySQL, MongoDB, React and Node. I enjoyed the experience of working with other classmates to create and present two full stack applications. During this time I learned the importance of self analysis and learning to be comfortable with technologies and techniques that would challenge me. I also learned the importance of communicating and sharing ideas.

I have over a decade worth of work experience in Tech. I started from humble beginnings as a computer repair technician and have worked with managed service providers in the triangle area. My work has always pushed me, and has been humbling. There is always something new to learn.

I feel that I have the potential to be a valuable asset to any creative team, given the right structure and balance. I have a continued interest in the field and work constantly, even outside of the bootcamp to develop my skills and widen my breadth of experience.

Yours truly,

Anthony J. Manenti
